

Inokuchi Camellia Hall – Park of Kainyo and Camellia

Modern space created by camellia and art

Camellia is the village (former Inokuchi Village) flower and is planted around the houses as residential trees known as Kainyo. This park is a camellia theme park that consists of Japanese garden, multipurpose hall, seminar house and turf playground.

The garden was designed to feature this area's natural environment with a pond, streams and relaxing garden houses. Inokuchi Camellia Hall serves as a center of a variety of activities, such as research on camellia, exhibitions and community activities. In the park, there is a wild camellia garden which has a collection of very rare species of camellia. The park is also a good recreational spot.

Neighboring facilities

Tsubakino-sono Park

– View point of the Tonami Plains

trails are good for forest bathing.

600 camellia trees of 160 species are planted on the mountain slopes. About 400 trees bloom from April to May. Walking

Oyukibata-tsubaki

– Precious old camellia tree

The tree age is estimated 300 to 500 years and the branch length is 6m. This is one of the oldest Camellia japonica and a rare big tree that grows naturally at low altitude. During flower season, large deep and vivid red flowers bloom.

Inokuchi Camellia Hall – Park of Kainyo and Camellia

This facility was developed in the center of Nanto City to preserve and research on species of camellia. Modern interior of the building is coordinated in black and white. Everyone can enjoy staying in the laid-back atmosphere. With barrier-free designing, wheelchair users can go into the building directly from the parking lot.

■ Multipurpose hall

The hall is designed for various events and exhibitions. This can also serve as a gallery space.

■ Entrance hall

There is a local specialty and product shop in the spacious lobby. Please enjoy yourself in a relaxing atmosphere.

■ Exhibition space

Facing the turf park, the space is a cozy exhibition space with pouring sunlight.

■ Seminar house (Tea house)

The relaxing Japanese style room serves as a tea ceremony room and a gallery space.

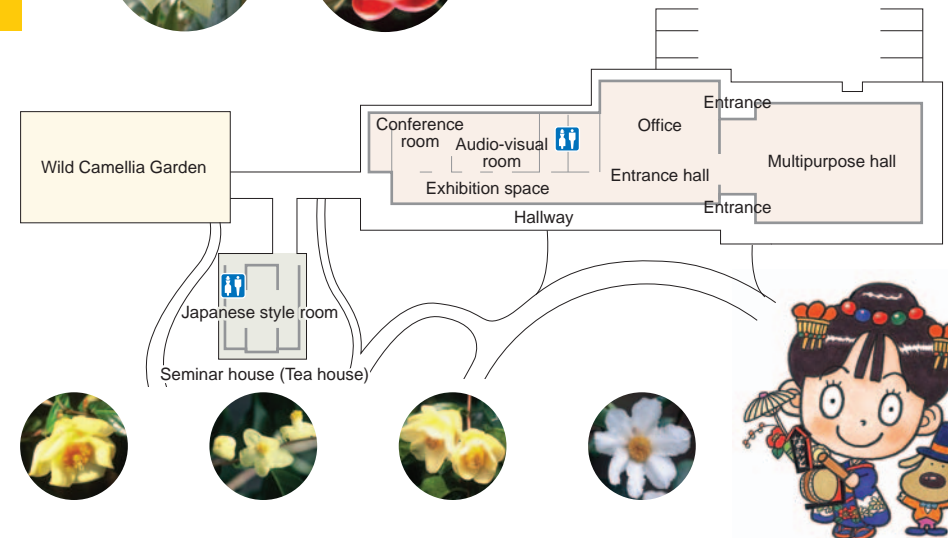

■ Conference/Audio-visual room

The rooms are used for conferences, events, and exhibitions. Next to the rooms, there is a library corner.

Wild Camellia Garden [Shuho Kirino Collection]

This is the only garden where more than 80 species of wild camellia of China and Vietnam are planted. Among them, yellow camellia is very rare and precious.
